I'd like to change the DRPS (for 17/18) entry for ITCS to say, under "other requirements":

This course is open to all Informatics students including those on joint degrees. It is also open to students in the School of Mathematics. Other external students whose DPT does not list this course should seek permission from the course organiser.

This is to open it to maths students without them having to ask me.

Bjoern says I can just do this, so please could you implement.

If you can also put an item "For Information" into the next BoS agenda to save me remembering about it in November or whenever, that would be great :)

Thanks,  
Julian.
