Coursework weighting for ANLP

ANLP currently has 30% of mark based on coursework. Last year we reduced the number of summative courseworks in ANLP from 3 to 2, changing the weighting from 10%/10%/10% to 10%/20%. However, I found that this caused students to put too much emphasis/time on the second assignment. I do not want to increase the weight on the first assignment because many students are still finding their feet on this one and it would stress them out too much. So instead I would like to reduce the total coursework to 25%, which would allow a 10%/15% split.
