Closing VV1 Instances on Informatics Courses

The following actions have been taken with regards to this item;

- VUG VV1 instance removed for 2019/20
- Added the following sentence "This course is open to full year Visiting Students only, as the course is delivered in Semester 1 and examined at the end of Semester 2" to the 'Additional Information (Assessment)' in the SV1 open to all students instance.
- Added the following sentence "This course is open to full year Visiting Students only, as the course is delivered in Semester 1 and examined at the end of Semester 2" to the main 'Course Enrolments Visiting Student' pre-requisites section.
- Amended the notes in the April/May exam diet in the 2019/20 instance to clarify there is only the one diet in Semester 2 from 2019/20 onwards.

These changes have been made for the following 7x courses;

1. Advances in Programming Languages (INFR11101)
2. Automated Reasoning (INFR09042)
3. Blockchains and Distributed Ledgers (INFR11144)
4. Computational Cognitive Science (INFR10054)
5. Introduction to Quantum Computing (INFR11099)
6. Principles and Design of IoT Systems (INFR11150) - note: this course has only ever had an SS1 'Not available to VUGs' instance, so no changes required.
7. Social and Technological Networks (INFR11124)
