Response to student feedback in 2018/19 course survey

I have taken note of the feedback from students in this course survey, and have the following comments in response.

- The comment "too much content": The amount of video time to watch is essentially the same as that for a live class, as it was originally based on the same live lectures.
- The comment "coursework which could take long time to implement": The coursework is for 30 credits, which should result in 30 hours of work. The coursework is done in teams of 2 to spread the workload if sharing is done effectively. The most recent survey showed that the median time was less than 30.
