Informatics Connect

Mini-course designed to help you enjoy and achieve in your academic life during the COVID period

1. Develop the soft skills that are key to success as an Informatics student and practitioner, including effective group work skills.
2. Build and develop relationships with other students beyond what is possible in your academic courses, and discuss your student experiences.
3. Help develop our approach to Online Blended Learning, so we can continually update and improve learning and teaching in this period through partnership with students.
4. Engage with core ideas that form the context of Informatics and Computer Science, such as the history of computing, the ethics of coding and decolonising the curriculum.

This course is non-assessed and lightweight.
