Comments Report

System Level Integration Practical (INFR10042_15-16_SS1_SEM1_ONLINE_CACOREINF_System Level Integration Practical) - Course Evaluation for

What did you find most valuable about the course?

- Enhancing inter-disciplinary teamworking skills.

- Experience setting up and maintaining a server

- The course allows a great amount of freedom, which isn't offered in any other courses.

- This course has almost zero teaching element, you are expected to teach yourself the neccessary skills for whatever you choose to do - this I think is particularly good, and something that really distinguishes this course.

- This is without a doubt the most useful and enjoyable course I have sat over my 4 years at University. It forces you to put your skills to application in a practical team environment, very similar to a workplace. I learned considerably more with this than I did with SDP. I can't recommend it enough.
