Small change to UG3 course: Introduction to Vision and Robotics

Reduce number of courseworks in IVR (Maurice Fallon)

IVR is a 10 point course with 2 substantial coursework assignments.
Feedback on the course was in general very positive this year - except
to say that the coursework workload was much too high for a 10 point
course.

After discussing with staff teaching other vision and robotics courses,
I/we propose to reduce the course assignments to one - likely the
robotics one.

A summary of the proposal is:
  * Reduce the number of courseworks from two to one.
  * Change the assessment distribution from Exam/Coursework 60%/40% to
    70%/30%.
For reference, the course webpages:
  * http://www.inf.ed.ac.uk/teaching/courses/ivr/
  * http://www.drps.ed.ac.uk/16-17/dpt/cxinfr09019.htm

The allocation of learning and teaching hours remains unchanged:

Total Hours: 100 (Lecture Hours 16, Supervised
Practical/Workshop/Studio Hours 10, Summative Assessment Hours 2,
Programme Level Learning and Teaching Hours 2, Directed Learning and
Independent Learning Hours 70)
