

Update on project showcase website
Iain Murray

Support have made a new UG4 + MSc project archive at:

<http://project-archive.inf.ed.ac.uk/>

It won't have old projects imported into it. Iain is requesting a link to a static snapshot of the old MSc archive.

As decided previously at TC, this archive will host projects that got marks $\geq 70\%$. For the record, inclusion won't be based on the student's overall programme-level classification, which is more complicated, and not necessarily related to quality of the project.

In addition, there will be separate pages for UG and MSc "Outstanding projects", those projects which scored $\geq 80\%$. It is planned that this addition will be complete by the end of February.

Projects will appear in the archive around November of each year, after the final exam board has approved the MSc projects.

Thanks to Tim Colles for creating the new archive.
