Year Organiser's Report

Year 1

No issues have been reported to me about any of the first year courses, except:

INF1-FP noted that the lecture capture system has been extremely unreliable and I have followed this up a little with IS. There is a new content-management system for videos planned for next year, but this will not include a replacement for the highly unreliable lecture capture. A bid has been made to replace this, but even if that were successful, it would not happen for at least another year. IS have agreed to see if anything can be done to improve the reliability of the existing system - but I am not hopeful that it is possible to improve this significantly.

   --Paul Anderson

Year 2

Unlike last year I have had no complaints about the inf2c-cs assignments, so the issues seem to have been dealt with by a combination of re-weighting, re-design, and setting student expectations appropriately (which Boris says he aimed to do this year).

On the other hand, there have been various issues with inf2c-se (as evident from Bjoern's blog). Many of these are organizational; Bjoern has discussed them with the lecturer. I've also had to deal with some issues related to partnering on the assignment. I think overall this has worked well but with such a large class there are bound to be some issues.

--AuH2O

Year 3

Nothing reported yet

Year 4

The second half of the semester has run fairly smoothly, with deadlines fairly well dispersed in the final weeks. STN extended its deadline (for the whole class) by a couple of days, but not because of any serious pressure.
