

Human-Computer Interaction (HCI)

Response to student feedback in 2018/19 course survey.

We will be taking over this course in 2019/20. We note the student feedback in this course survey, and have the following comments in response.

- We recommend looking instead at the 2018/2017 course feedback as one of the two lecturers (Kami Vaniea) taught a very similar version of HCI in that year.
- The tutorials were well recieved, as in prior years, and we will keep them. Though we will be modifying the content somewhat to better match the coursework.
- Overall we expect the course structure and content to be similar to prior years.

Kami Vaniea and Aurora Constantin, 4 June 2019
