

INFR11157 – Natural Language Understanding, Generation, and Machine Translation

Response to student feedback in 2018/19 course survey

I/We have taken note of the feedback from students in this course survey, and have the following comments in response.

- A consistent theme of the 2018/19 course feedback is that students would like tutorials. These have been added for 2019/20.
- We are continuing to refine the course material, but students should understand that this is an extremely fast-moving field, and it is difficult to have material that is both up-to-date and highly refined/ practiced. Since this is an advanced course, it contains a substantial amount of up-to-date material. Students taking the course should expect that the material will not be perfected yet, and it may require more effort on their part to understand.
