

Natural Language Understanding, Generation, and Machine Translation (NLU+)

Response to student feedback in 2020/21 course survey

We have taken note of the feedback from students in this course survey, and have the following comments in response.

- There were minor problems with some of the lecture recordings, but these were fixed as soon as the students pointed them out.
- The lecturers are aware of the issues with the class test; these will be addressed next year.
- As several students have commented, this is an advanced course that requires considerable prior knowledge in NLP and ML, as well as strong programming skills. This was explained in lecture 1 and on the course Learn page.
