

Computer Architecture and Design (CARD)

Response to student feedback in 2021/22 course survey

I have taken note of the feedback from students in this course survey. All of the very helpful suggestions for improvement will be worked into the course for 2022-23.

For the coming academic year (2022-23) the lab exercises will once again run in-person (at least that is the current plan). However, we will continue the practice of distributing FPGA boards to all students, as this will offer full flexibility on where and when the practical work is done.
