Response to student feedback in 2021/22 course survey

I have taken note of the feedback from students in this course survey, and have the following comments in response.

- This year the course had to be delivered in hybrid form, with lectures livestreamed and recorded. I apologise this came with some hiccups. Because it is no longer needed, and the use of lecture recordings was very low, next instalments of the course will be in-person only, avoiding these issues altogether.
- The course materials are freely available in the library, as linked to on Learn.
- Next year the course will be redesigned, to place less emphasis on advanced theory, and much more emphasis on practical quantum programming languages. More examples should make it easier to follow the ideas for future students.
