

Parallel Programming Languages and Systems (PPLS)

Response to student feedback in 2021/22 course survey:

Thanks for your kind feedback. With respect to the request for more practical exercises, I don't want to increase the assessed workload, but I do remind you that the source for many of the demo programs is available on the course site. You can have great (educational) fun, breaking, fixing and amending these!

Murray Cole, May 2022
