

# Informatics 2D: Reasoning and Agents (INF2D)

Response to student feedback in 2022/23 course survey

We have taken note of the feedback from students in this course survey, and have the following comments in response.

- We are delighted that the feedback on tutorials is so positive. One student observed that this is where learning happens. We couldn't agree more.
- We are unable to support the FF planner on Windows. We simply don't have the resources to support all operating systems. We strongly encourage students to run this coursework on DICE, since this is the platform on which we test the coursework.
- The feedback on the first coursework is noted. We have plans to change it next year.
