Applied Databases as 10 credit course – S. Maneth

1) We will change to one summative assessment instead of two.
2) We will change the weight of this assignment to 40% and 60% to the exam.

For marking of the assignment 20h will be sufficient, for preparation of the assignment/automarking etc, 30h of TA should suffice.

These numbers are precisely within the limit suggested by Ian Stark at a recent BoS meeting – http://web.inf.ed.ac.uk/sites/default/files/atoms/files//course_workload_assessment.pdf
