

## School of Informatics

---

### Computing Strategy Group

#### Remit

- To develop the School's Computing Strategy to ensure that the School's computing facilities and services support the School's research and teaching objectives.
- To develop and oversee implementation of the School's annual computing plan, identifying priority actions and projects to ensure delivery of the School's Computing Strategy. It is likely that the Committee will set up fixed term working groups to develop recommendations on key issues and/or implement elements of the annual plan. These working groups will report back to the Committee on a regular basis.
- To review business cases for significant investment in computing infrastructure and make recommendations to Head of School.

The Computing Strategy Group does not have responsibility for operational computing matters, unless issues arise that have the potential to impact the School's ability to deliver on its research and teaching objectives and require a strategic solution.
