

Performance Modelling (Distance Learning) (PM-DL)

Response to student feedback in 2019/20 course survey

I/We have taken note of the feedback from students in this course survey, and have the following comments in response.

- I am glad that the students found the techniques and tools introduced in the course interesting and potentially useful in the workplace.
- It was my first time working through collaborate sessions and I learned a lot in the process. I think that the criticisms are valid and I would do things differently in the future to create more interactions between the students, rather than focusing on the students' interactions with me.
- I would also have a session at the beginning of the course making clear all the different material that is available to students and how they might use it to support their studies.
