

# Introduction to Vision and Robotics (IVR)

Response to student feedback in 2019/20 course survey

I have taken note of the feedback from students in this course survey, and have the following comments in response.

- We understand that several students found the coursework assignment challenging. For the next iteration, we will re-assess the difficulty level of the assignment. Also, we added extra tutorials to familiarize the students with the software platforms used in the assignment. Additionally, this year the students will have 1 extra week to work on the assignment. Moreover, per students requests the online course material for the robotics part of the course are updated.
