Revised Distance Learning Course Titles

Bob Fisher

April 28, 2017

Three courses have recently been approved for distance delivery:

1. Agent Based Systems (Distance Learning) (INFR10071)

2. Introduction to Java Programming (Distance Learning) (INFR09048)

3. Introductory Applied Machine Learning (Distance Learning) (INFR11139)

The University has asked that the qualifier "(Distance Learning)" be removed from the titles as the courses are essentially identical to the on-campus courses (which have a different code).

Accodringly, we ask that the three courses be renamed:

1. Agent Based Systems (INFR10071)

2. Introduction to Java Programming (INFR09048)

3. Introductory Applied Machine Learning (INFR11139)
