

Minimum credits for the SE UG4 collection in the Software Engineering DPT:

Following the restructuring of UG3 courses and introduction of 20 credit point courses last year we encountered an "anomaly" in the SE UG4 collection of the Software Engineering DPT. Currently, there is a minimum requirement of 10 credits. Should this be raised in line with the CS and AI degrees? Given that we now have a larger collection of SE courses this would change would contribute to increase consistency across DPTs.
