

UG1 Staff Student Liaison Meeting - Wednesday 29th November 2022
Room 7.14, Appleton Tower

In attendance Michel Steuwer UG1 Year Organiser, Julian Bradfield INF1-CL Lecturer, Don Sannella INF1-FP Lecturer, Boyao Song, Tanisha Agarwal, Annie Loi, UG1 Student Representatives

INF1-FP

The students reported that the lectures were enjoyable, they found the comprehension in Haskell very helpful. The difficulty was about right.

The optional questions in tutorials were found to be time consuming.

The formatting of the Quizzes on Learn was confusing, as multiple versions of the same code snippets were shown (to increase accessibility). The lecturers promised to look for a better solution next year.

Tutors and demonstrators were found to be helpful, although they sometimes appear as though they are not very well prepared and can be unsure when approached by students for answers, especially when the tutorials are released on a Tuesday. The tutors came across as quite varied in their teaching and knowledge.

INF1-CL

The students found this part of the course quite difficult, they found the textbook hard to understand. Tutorial 9 the students found the switch to Mathematical mode hard to follow.

The catch-up lectures were praised to be helpful.

The students in general found the course good and well organised, there was no clashes with any other coursework's.

Piazza is very helpful with very quick responses.

The lab held on a Friday is very good, although the lab on a Monday is very busy.
